DEVAYANI SHRIKANT BHOSALE

Product Manager | SaaS | HR Tech | Health Tech

+1 (540) 553-6864 | devayanibhosale28@gmail.com | linkedin.com/in/devayanibhosale | Portfolio | Open to Remote / Hybrid | USA

PROFESSIONAL SUMMARY

Product Manager with 6+ years of experience across B2B SaaS, HR Tech (HRMS), and Health Tech. Proven record of building user centric products combining deep user empathy with data-driven roadmap decisions to drive adoption, retention and business growth. Contributing to a cross-functional product organization during a period of rapid scale, where the platform grew 53% in customer base and 75% in revenue from 2022 to 2024. Certified Scrum Product Owner (CSPO) with additional credentials in AI for Product Discovery & Strategy, bringing an AI-augmented approach to discovery, prioritization, and stakeholder communication.

CORE COMPETENCIES & TOOLS

Product & Strategy: Product Strategy & Roadmapping, Product Discovery & Feature Prioritization, PRD / BRD & User Stories, Go-to-Market (GTM) Planning , Backlog Grooming & Sprint Management, Agile / Scrum / Kanban

Research, Data & Leadership: User Research & Usability Testing, Customer Journey Mapping, Data Analysis & KPI / OKR Tracking, Cross-Functional Team Leadership, Stakeholder Management & SOPs

Tools & Technologies: JIRA, Confluence, Miro, Figma, Wireframing, Prototyping, Amplitude, Superset, Google Analytics, AI Tools, Prompt Engineering

WORK EXPERIENCE

Independent Professional Development — Jun 2024 – Present

Self-directed | USA

Actively investing in professional growth in AI-driven product management, community leadership, and industry engagement while preparing to re-enter the US market.

- Continuing to expand expertise through professional certifications. Recently completed AI for Product Discovery & Strategy and AI Prompt Engineering (Scrum Alliance, 2026) with a focus on staying ahead of AI-driven trends reshaping product management.
- Active member of Toastmasters International (in-person and virtual) to develop executive-level public speaking, storytelling, and leadership communication skills.
- Active member of ProductTank to engage with the global product management community through events, discussions, and peer learning.

Product Manager — Jan 2022 – May 2024

Greytip Software Pvt. Ltd. (greytHR) | Bengaluru, India

Cloud-based HRMS / B2B SaaS platform that scaled 53% in customer base and 75% in revenue during 2022–2024, through cross-functional growth across product, sales, and marketing.

- Contributed to product-led expansion across India and other parts of Asia; working alongside cross-functional PM, sales, and customer success teams to onboard enterprise clients by fulfilling 85% of their product requirements on time, with product improvements.
- Owned the HRIS and HRAS domain roadmap end-to-end; shipping 2 major and 5 medium features per quarter at a 93% on-time delivery rate, including an Employee Onboarding Portal, Identity Authentication System, Automated Workflows, Alumni & Rejoined Employee Service, Custom Employee Forms, Employee Engagement System, greytAI (AI-powered writing assistant), and more. Key outcomes include approx. 60% growth in monthly employee onboarding volume, complete elimination of identity fraud for 32 adopting enterprise clients, and approx. 60% reduction in manual HR follow-ups — detailed case studies available in portfolio.

  Product Case Studies: *[portfolio link]* | *Identity Authentication System* | *Automated Workflows* | *Employee Onboarding Portal*
- Adopted an AI-augmented approach to product management using AI tools to accelerate competitive analysis, synthesize user feedback at scale, and streamline data summarization for roadmap reporting, enabling faster and more evidence-based prioritization decisions.

- Coordinated a 25-member cross-functional team across engineering, marketing, sales, and support — managing a Kanban-based delivery workflow, grooming backlogs, writing acceptance criteria, and conducting post-delivery retrospectives to continuously improve team velocity and release quality.
- Championed consistent SOP adherence across product and support workflows — ensuring 5 teams followed established processes, which contributed to a 17% reduction in support tickets through structured knowledge transfer, team briefings, and a revamped customer knowledge base ahead of each product launch.
- Defined and tracked KPIs and OKRs using Amplitude, Superset, and Google Analytics; presented quarterly roadmap reviews to executive stakeholders with data-backed prioritization decisions.

Product Owner Aug 2020 – Dec 2021

Dharma Life Sciences | Bengaluru, India

Health-tech startup building a neuroscience-based mobile wellness app focused on personality trait development and mental health through evidence-based behavioral coaching.

- Owned the full product lifecycle; from ideation, market research, and PRD authoring through Figma wireframing, UI/UX mockups, test case writing, and iterative feature delivery.
- Led a cross-functional team of 7 (engineers, content writers, and marketing specialists), aligning all stakeholders around product strategy and organizational KPIs.
- Conducted UX research, user persona development, and qualitative feedback analysis to continuously validate and refine core product features.
- Improved overall app functionality and user experience by 35% through rigorous QA cycles and usability testing, identifying and resolving critical UX bottlenecks.
- Developed and executed a brand awareness and social media engagement strategy, expanding the product's digital presence and driving sustained growth in user engagement across platforms.

Research Scientist Mar 2016 – Aug 2020

Dharma Life Sciences | Bengaluru, India

- Conducted in-depth research on personality traits and mental health conditions, including ADHD, bipolar disorder, and borderline personality disorder; studying neurological foundations such as grey and white matter changes, neural network development, and neurotransmitter activity to inform evidence-based product design.
- Translated neuroscience research into product features; designing game mechanics grounded in learning theory to rewire maladaptive neural patterns, reduce harmful behaviors, and reinforce healthy habits in users.
- Framed game and feature requirements in collaboration with engineering and content teams, leading cross-functional meetings to align research findings with product implementation and delivery timelines.
- Recruited and interviewed candidates to build the team supporting product research and content development.
